## About

I started my career as a Game Developer in an R&D role at Ingenuity Gaming where I created colourful and feature-heavy experiences for clients. Then I carried over this expertise to my next organization H&P, lending my hand in making the lives of rig operators easy! I had a stint with Microsoft as a PM Intern, got a PPO later, loved it!

I've finished 4/6 terms of my PGP curriculum at IIM Ahmedabad and am actively involved in a variety of clubs and discussions

Recently spent some weeks learning about AI prompting essentials out of curiosity, which really helps me now to get accurate responses a tad bit quicker!

Some stuff worth sharing that would possibly help everyone:

1. Follow a **framework** for the prompts: Specify the task by adding persona and format of output required - Add context like story and ...more

Today, we have the technology to have real conversations. Imagine if you could have a conversation with James Clear or Ben Horowitz. They have a body of work—books, podcasts, articles—that you can refer to answer your specific questions, and they can respond with their thinking.

This isn't just a better reading experience, it's a whole new category: ...

## Experience

**Events and Community Cell Head**

The ProdMan Club | IIM Ahmedabad · Full-time

Mar 2025 - Present · 9 mos

Ahmedabad, Gujarat, India · On-site

## ❖ Event Management

**Product Management Intern**

Microsoft · Internship

Apr 2025 - May 2025 · 2 mos

Hyderabad, Telangana, India · On-site

| Received PPO |

During my internship, I embarked on a deep dive into the everyday challenges developers face with a proprietary process, immersing myself in their experiences through extensive interviews and surveys. I discovered critical pain points, hidden barriers that slowed their productivity and impacted morale.

By carefully analyzing feedback, I uncovered significant gaps between the available tools and what developers truly needed. Rather than reinventing the wheel, I strategically identified ways to enhance and integrate existing resources, streamlining workflows and reducing cognitive overload.

Collaborating closely with multiple internal teams, I crafted clear, intuitive solutions, complete with strategic mockups and user journeys, to empower developers and simplify their day-to-day processes.

Finally, I translated these insights into actionable recommendations for leadership, which will help drive impactful decisions focused on developer efficiency and satisfaction.

## ❖ Microsoft Copilot, Wireframing and +1 skill

**Software Engineer 1**

Helmerich &amp; Payne · Full-time

Sep 2023 - May 2024 · 9 mos

Noida, Uttar Pradesh, India · On-site

I was working as a Frontend Developer at Helmerich & Payne (H&P), a leading provider of drilling and completion services to the energy industry. In my role as a Software Engineer 1, I focus on building and maintaining the user-facing web applications that H&P employees and partners rely on daily.

Contributed to a new internal project designed to improve the user experience for drilling operations. This project involved building a user interface (UI) that enables efficient well management from a single location.

My role focused on the user experience (UX) for both internal and external users. This includes designing interfaces that allow:

- Remote control capabilities: Operators can manage drilling operations remotely.
- Multiple well management: The UI facilitates drilling of multiple wells from a single interface.

By crafting intuitive and user-friendly interfaces, I helped to optimize well management and empower both internal and external users.

## ❖ Vue.js, Model-view-viewmodel (MVVM) and +4 skills

**Ingenuity Gaming**

Full-time · 2 yrs 5 mos

Noida, Uttar Pradesh, India

● **Game Developer - Research (Tier 1)**

Jan 2022 - Sep 2023 · 1 yr 9 mos

On-site

Worked as a Game Developer with the designation of Researcher(Tier 1). I focussed on creating new and leveraging existing frameworks, and tailoring it as per the requirement of a wide variety of slot games and projects using technology of Typescript, PIXI, etc. The role entailed work and coordination with many teams like Art & QA, along with knowledge of rules and regulations concerning the casino gaming industry in various nations.

## Responsibilities:

- Create and maintain wrapper for games

- Create slot games: Covering both frontend and backend, work ranges from UI designing to many interesting specific features per game
- Bug fixes
- Product Deployment
- Client communication

▽ TypeScript, React.js and +8 skills

## Projects

### PIMA Indian Onslaught of Diabetes

Jun 2020 - Jun 2020

[Show project ↗](#)

Tools used: Python, Flask, HTML

This project describes patient medical record data for Pima Indians and predicts using a sequential model whether they had an onset of diabetes within five years. The aim is to build a model robust enough such that if we feed in more data in the future, it could prove beneficial to the medical world.

### Last Words at Deathbed (Case study): Pagerank, Spidering, Scraping and Visualizing

Dec 2019 - Mar 2020

[Show project ↗](#)

I worked on the data from:

[https://www.tdcj.texas.gov/death\\_row/dr\\_executed\\_offenders.html](https://www.tdcj.texas.gov/death_row/dr_executed_offenders.html)

My aim was to get a list of all the last statements by those who were executed and then make a WordCloud visualization of the most often words by them, conditions being that length of words should be greater than 5. I started with spidering the data from the site, used BeautifulSoup for the anchor tags, and then again for the consequent paragraph tags, put them into a list and consequently wrote into a file. I imported that file in a datagram, cleaned it and exported it to csv, which helped me in converting to sqlite. Then I created a python file to get the visualization.

## Volunteering

### Scout

 The Bharat Scouts and Guides

Apr 2007 - Apr 2011 · 4 yrs 1 mo

Civil Rights and Social Action

Indulged in social activities during my time at Kendriya Vidyalaya AFS Sarsawa, Saharanpur, UP.
